Thursday the 14th of September at 5
minutes past 11 O. C. P.M. A.D. 1854

Finis -

ber vermittelst eines Siebes
Drahtlöffels in diese heiße Mischung.
Ziehe sie aber sofort wieder heraus
und lege sie zum Abtrocknen in eine
Pfanne. Sind die Eier abgetrocknet,
so stelle man sie mit Hafer, Hülsen
oder Kleie verpackt an einen trockenen
Ort. Die Mischung kann immer wie-
der gebraucht werden, sie gibt dem Eier
einen antiseptischen, luftdichten Ueber-
zug und schützt so vor dem Verderben.
Kauft die Hausfrau die Eier wenn sie
billig sind und behandelt sie so, kann
sie viel ersparen. So behandelte Eier
hielten sich in unserem Hause ein volles
Jahr vollkommen gut und schmeckten
wie frische.
